Art Unit:

Claims 3-9 are presented for examination.

Claims 3 and 9 are rejected under 35 U.S.C. 102 (b) as being anticipated by the Japanese Patent Application for the reasons set forth on page 2 of the office action of February 12, 2002.

Applicant's arguments and remarks have been carefully considered, but are not deemed to be persuasive. Applicant alleges criticality to the injectable composition of the present invention in comparison with the general use taught by the prior art. The allegation is not well taken. Different routes of administration for a pharmaceutical formulation is considered to be the inherent property of such composition. Applicant has presented no evidence to establish the unexpected or unobvious nature of the claimed invention, and as such, claims 3 and 9 are anticipated by the Japanese application.

Claim 4 is rejected under 35 U.S.C. 102 (b) as being anticipated by the Applicant's admission. Applicant on page 9 of the specification admits that the Japanese Patent Application teaches the use of the claimed compounds in a pharmaceutical formulation in a liquid or solid form. The above reference makes clear that the claimed composition is old and well known.

Claims 5-8 at present time are considered to be allowable.
